Chairman's Message

With a bonded family of experienced technocrats, our vision is in the right direction to excel further in meeting our goals

Dear Stakeholders

With great pride, Wilorton Holding has successfully planned and managed its' transformation to compete at regional and international levels since its birth in 1998.

Wilorton Holding Inc. offers leading Design, Engineering, Manufacturing, and Project Management expertise in Oil and Gas, Power grid and Power Generation Industry, OEM/MRO spare parts, Mechanical works, Special Vehicles, Process Automation, Technical and Procurement services end-to-end solutions. I want to thank my team and partners for their Passion, Commitment, Integrity, and Hard Work. Your dedication is reflected in the reputation of Wilorton.

We pride ourselves in being the most reliable and efficient partner to our clients for their engineered needs in Europe, Asia, Africa, and the Middle east. Over the years, Wilorton has provided products and services to a large customer base, international and domestic clients. At the same time, we have established partnerships with many manufacturers and distributors to obtain and inventory the necessary products in this service industry.

It's part of the Management's vision to invest in diversified supply and service companies; Wilorton is seeking business partners to establish joint ventures related to the Oil & Gas industry across the globe.

Today, Wilorton's approach to building a pioneering and socially responsible business enterprise has contributed to our firm position in the market that customers trust. The confidence that we enjoy from our partners and customers is a testimony to our commitment to quality service and exceeding market expectations. I am proud of what we have achieved and maintaining our enviable position in the industry. We conduct our business safely and in a socially responsible and ethical manner. We respect the law of the land, protect the environment, and benefit the communities wherever we work.

We deliver worldwide cost-effective and quality products, providing seamless value-added services together with an unparalleled customer support service operating 7/7.

We look forward to doing business with you.

Pietro Tedoldi
Chairman

Who we are

Wilorton Profile

Wilorton Holding Inc. offers leading Design, Engineering, Manufacturing, and Project Management expertise in Oil and Gas, Power grid and Power Generation Industry, OEM spare parts, Mechanical works, Special Vehicles, Process Automation, Technical and Procurement services end-to-end solutions since 1998.

The leadership

At the core, Wilorton holding Inc is entrepreneurial. Our hands-on leadership team is a diverse group that empowers efficient and sound decision-making across the company. The Board is comprised of accomplished leaders with varied backgrounds who ensure good governance, strategic discipline, and effective risk oversight.

Our Team

In every office across all countries, you'll find passionate, collaborative, and diversified people who care for you and your success. We work alongside you every step of the way, helping your business take confident strides toward its full potential.

QHSE

The long-term business success of Wilorton Holding Inc depends on our ability to continually improve the quality of our services and products while protecting people and the environment. Emphasis must be placed on ensuring human health, operational safety, environmental protection, quality enhancement, and community goodwill. This commitment is in the best interests of our customers, our employees and contractors, our stockholders, and the communities in which we live and work.

Sectors

- Oil and Gas
- Power and Utilities
- Petrochemical
- Marine

A long-standing QHSE commitment to the highest standards

Our Capabilities

Wilorton has extensive experience in Engineering and Project Management of Power and Utility sectors, Greenfields, and Brown field-based projects. Expertise also extends to Brown Field expansions, Automation Upgrades, and other complex facilities upgrades.

ENGINEERING

WILORTON has the essential resources and talents in-house to bring the most practical solutions tailored to the Clients' needs. In addition to the multi-disciplined "one-stop-shop" service, we deliver technological engineering and design solutions to meet the relevant internationally accepted codes & standards applicable to statutory rules and regulations.

Our team of expert Engineers covers the following Engineering Disciplines:

Our team of expert Engineers covers the following Engineering Disciplines:

- Conceptual Engineering Design
- Feasibility Study
- Basic / Front End Engineering Designs
- Detailed Engineering / Design

ENGINEERING

Our Capabilities

Conceptual Engineering Design

Our group of qualified and experienced engineers develops concepts of several possible engineering solutions based on the Client's needs by implementing the best engineering practices. By the end of this stage, several conceptual engineering solutions with the general design layout and basic calculations are delivered to the Client to select from, along with the recommendation for the optimum solution.

Feasibility Study

Based on our broad experience and deep understanding of the industry and market trends, we conduct studies to evaluate the market opportunity and validate the technical & economic feasibility of the proposed designs. Ultimately, we produce a Feasibility Study report that outlines the outcome to the Client and assists him in making subsequent decisions for the project.

Basic/Front End Engineering Design

This package translates the project's conceptual design or feasibility study into an optimum & comprehensive engineering design that reflects the Client's requirements while adhering to applicable statutory rules and regulations. Depending on the Client's need, the outcome is transformed into the Basic Engineering Design package covering all engineering design basics or the more detailed Front End Engineering Design (FEED) package, which can form the technical basis of the Tender Package.

Detailed Engineering Design

Detailed Engineering Design is the essential bridge between the FEED and the project's construction phase. Our team of reliable and experienced engineers & designers is fully capable of delivering the complete Detailed Engineering Design package defining all details necessary for construction. Latest Computer-Aided Design (CAD) tools are highly used to develop the optimum design ensuring maximum structure, operational, and Maintenance convenience. We adhere to relevant standards, specifications, procedures & regulations.

ENGINEERING

Our Capabilities

Wilorton offers a range of services supporting the complete project cycle from FEED stage to the final handover of the facility to the client

PROJECT MANAGEMENT CONSULTANCY

When we offer our Project Management Consultancy package to our Clients, know that their project lies in safe hands.

From tender preparation & administration to the final commissioning and handover, our Project Team will closely supervise every aspect of the project, ensuring that our Client's interest is best protected. In other words, when we say "Client Representative," we truly mean it.

Our Project Management Consultancy service spans the entire project execution phase, including but not limited to the following:

- Tender Package Preparation and Administration
- Contract and Procurement Management
- Project Execution Planning & Control
- Construction Management & Supervision
- Quality Management
- Project HSE Management
- Risk Management & Cost Control
- Project Pre-commissioning and Commissioning Assistance

PROJECT MANAGEMENT

Our Capabilities

Reliability is our keyword in manufacturing mechanical components and spare parts for companies seeking to reduce production costs and time.

PRECISION MACHINING

Our machining capabilities are designed to meet essential industry requirements with the following offerings:

We manufacture customer-specified goods with quantities ranging from one piece to more than 1000s. We deal with various materials like SS316L, SS304, Mild Steel, Gr8.8, Gr 10.9, Aluminum, Brass, Nylon, Teflon, etc.

With the latest production facilities & inspection facilities available with us, we can manufacture components at par with international standards.

- Three-and five-axis milling machining soft and hard materials
- Turning
- EDM, grinding
- Plastic injections
- Laser and TIG welding
- Rectification process
- Three-point bending, roll forming, shot peening by ultrasonic and blasting
- Assembly for faster installation, torquing, bushing, and bearing installation

Our Company's mission is to provide a manufacturing facility capable of performing custom precision machining.

Production component manufacture works in prototype and production quantities while offering the latest machining and fabricating techniques. We have a proud record of meeting the precision requirements for a significant list of valuable customers.

PRECISION MACHINING

Our Capabilities

We give utmost importance to customer support and service. Supported by our principals, our engineers are well-trained to handle the challenges

Procurement

Wilorton Holding Inc offers a fully qualified team of procurement engineers, officers, QA/QC engineers and logistic personnel with the expertise to deliver the right material at the right time for project execution.

Our procurement team meticulously and systematically identifies and quantifies procurement practices that are effective in delivering value-for-money services as well as identifying opportunities for improvement.

This team is also responsible for implementing procurement strategies and business practices that will provide operational efficiencies and cost savings.

OEM Spare Parts

We serve a variety of Companies in the work-over rigs for onshore and offshore applications and a wide range of specific drilling equipment in the Oil and Water Fields.

Manufacturing and supplying mechanical spare parts (shafts, pins, wedges, supports, spacers, plates, brasses, flanges, etc.), for Mechanical & Hydraulic drilling rigs.

Custom-made parts for drilling system e.g., spare parts for Duplex/Triplex Mud Pumps, connecting rods, cross heads, rotating casing, etc. with timely deliveries: delivering parts made to Customers' specifications and drawings, quickly and efficiently at the lowest cost.

Reliability is our keyword in the manufacture of mechanical components and spare parts for all those companies seeking a reduction in production costs and time in the digging fields: we're equipped with a wide and modern machine tools pool, numerically controlled with coordinate's detector, to manufacture metallic structural parts.

Agencies and Distribution

We strive to provide the optimum, most economical, and best technical solutions to your requirements. Our staff has a long field and good hands-on experience.

We are in partnership, agency, and distribution agreement with World-renowned brands of industrial products catering across Oil and gas, Power industries, and Petrochemical.

Supply & Trade

Our Capabilities

Wilorton's Facilities spread across Europe, Asia, America, and the Middle East to serve our customers better and quickly.

Our Business Divisions

POWER AND UTILITY

The fast-growing and successful growth achieved in the past 20 years has mainly resulted from the dynamic vision of the Company's Management. State-of-the-art facilities and self-developed technologies have enabled the Company to propose innovative products and services to the market.

LIVE LINE T&D POWER LINES, OUTDOOR SUBSTATIONS & GANTRIES

POLLUTED INSULATORS WASHING SYSTEMS WITHOUT POWER OUTAGE

Reduce network outages, eliminate "cold" cleaning maintenance (De-energized and grounded system), repair costs, and improve the income statement from the loss of turnover. In coastal and inland Utilities with climatic areas subject to dry weather period followed by a dust storm, fog, mist, light rain, and in the proximity of significant contaminants sources (Deserts, Coal, cement factories, Industrial/Agricultural pollutants, dust, cooling towers effluents, etc.), we recommend Utility's operators to implement a preventive maintenance program with insulator's washing systems.

POWER GENERATORS AND SUBSTATIONS

We deliver high-efficiency compact generating sets, environmentally friendly, reliable, suitable for long-term power projects, rental applications, mining, construction, industry, emergency services, and civil defense. Our Gen sets range from 2 to 3000 kVA and are powered by the best engines and alternators available on the market.

WILORTON TECNOGEN POWER SUBSTATIONS up to 40 MW with unique synchronization systems and innovative remote-control units. Our product includes metal halide lamps or innovative LED technology LIGHTING TOWERS. We serve a variety of Companies in the Oil and Water Fields, Commercial, Industrial, Hospitals, and emergency services

POWER & UTILITY

Our Business Divisions

POWER AND UTILITY

SOLAR POWER

We believe that a great revolution is occurring in today's energy industry. There is a shift in our collective social consciousness. It is becoming evident that the time has come to leave behind the conventional polluting sources of energy and switch to non-polluting, renewable, and sustainable energy sources. Our vision is to take part in this 'energy revolution' by accelerating the adoption of solar technology across India to conserve our environment and provide a sustainable / conflict-free power supply to all.

T&D STEEL MONOPOLES

We design and manufacture a wide range of high-quality steel tapered poles for MV/HV/EHV power lines, substations, and distribution applications. Based on ACCS company expertise, detaining over 50 years of experience in the field of steel construction for industrial, naval, and off-shore industries, we have delivered around the world poles to support almost any voltage class. Our strengths in this field are Custom engineering and design, Flexibility, Reliability, and Cost-effective

LV & MV POWER DISTRIBUTION PANLES

The Switchgear division at Wilorton offers complete solutions to all Low voltage power distribution requirements related to the residential, commercial, industrial and infrastructure sectors as per clients' specifications. Our Low Voltage products have provided complete solutions with record operational reliability and safety.

T&D EQUIPMENT SUPPLY

Wilorton Holding provides experienced Trading, Technical & Procurement Services for power lines, power generation, and petrochemical applications.

We are committed to providing the highest quality products and services, exceeding our Clients' expectations of reliability and durability. All our products are tested and approved by relevant international standards.

POWER & UTILITY

Our Business Divisions

OIL & GAS

OIL AND GAS

UPSTREAM

Wilorton is the market leader in the manufacture, supply, and management of bespoke metal products for the Oil & Gas Upstream industry. We concentrate on servicing the Downhole, Subsea and Surface segments ensuring our customers' supply chains are efficient and effective.

Our products drive the Drilling, Evaluation, Completion, Production, and Intervention stages of Oil & Gas extraction and delivery. Wilorton has significant experience and capability providing ingot/billet, forged, and rolled round and flat bar, semi and finish machined components, and complete turnkey assembled packages.

Our expertise provides a comprehensive and reliable supply chain partnership from providing raw material through its processing to forging and machining into finished or semi-finished components, enabling us to respond rapidly on a worldwide basis to our customers' requirements for both material and product solutions.

SUBSEA SYSTEMS

- Production
- Drilling
- Trees
- Tie-In and Flowlines
- Chokes and flow Modules
- Manifold Pipeline
- Well access
- Processing
- Pumping
- Compression
- Separation
- Power Transmission
- Pipeline
- Mooring

DOWNHOLE SYSTEMS

- Drilling
- Evaluation
- Completion
- Production
- Intervention

SURFACE SYSTEMS

- Wellhead
- Drilling
- Completions
- Production

Our Business Divisions

OIL AND GAS

DOWNSTREAM

Wilorton manufactures, supplies, and manages the Mid and Downstream sector. We are one of the leading suppliers, stockists, agent, distributor of Specialized Oil and gas engineered products.

We offer below products and services to our esteemed customers

- Midstream pressure equipment for Oil & Gas treatment and transportation.
- Downstream pressure equipment for Refining, Gas Liquefaction, Gas to Liquid, Scrubbing, De-Hydration.
- Petrochemical pressure equipment for Nitrogen-Hydrogen plant processes.
- Chemical pressure equipment for “Plastic Products” and power pressure equipment for Steam Condensing, Waste Heat Recovery, and Heaters.
- Industrial Heaters
- Chemical Injection skids
- Pumping skids
- Heat exchangers
- Ventilation and Colling systems
- Industrial HAVC equipment
- Pipelines
- Industrial Fittings
- Pumps
- Valves
- Compressors
- Hoses and fittings
- Industrial Tools

OIL & GAS

Our Business Divisions

OIL & GAS

OIL AND GAS

FLOW CONTROL

We offer a complete range of application-specific valves from our premier legacy brands. Our highly engineered valves are known to be durable, long-lasting, and field-proven in the most severe conditions.

Serving oil and Gas, traditional, renewable, nuclear power, general industry, and water and wastewater customers. Each valve is backed by a unique level of support, and service to ensure your project or operation is optimized no matter your environment, schedule, or your contract size.

Our product specialists provide invaluable guidance, reduce your process time, and ensure maximum operational efficiency and profitability for your projects. Our global supply network delivers the quality OEM spare parts you need when and where you need them.

- Ball Valves
- Butterfly Valves
- Check Valves
- Choke Valves
- Control Valves
- Desuperheaters and Turbine Bypass
- Diaphragm Valves
- Gate Valves
- Globe Valves
- Isolation Valves
- Pilot Operated Pressure Relief Valves
- Plug Valves
- Safety Valves
- Spring Loaded Pressure Relief Valves
- HIPPS packages

Apart from the above we have extended stock availability of Seamless Pipes Stainless steel, Tubes & Fittings in Steel and Alloy Steel, Heat Exchanger Tubes, wire line, Austenitic Duplex and super. Duplex, Stainless steel. Coil Tubing and control Lines, Wireline / control line /Tubing and fittings.

Our Business Divisions

OIL AND GAS

MEASUREMENT AND CONTROL

Wilorton is a Major Supplier of Process Instruments, Control Systems, and Solutions to the Oil and Gas, Petrochemical, Utility, and Industrial Market. We offer a well-proven wide range of reliable products, systems, and services from world-renowned Principals to our customers worldwide. With a team of qualified Engineers, we offer Profession Turnkey Solutions and After Sales Service support to meet our customers' growing demands.

We are one of few companies capable of offering products ranging from standard field Instruments up to Asset Management Systems. We have successfully executed several turnkey projects with well-established customers over 20 years.

Our Product ranges

- All Kind of Field Instrumentation
- Process and Environmental Analysers
- Instrumentation Tubes, Fittings, and Accessories
- Instrument and control cables
- Instrument test tools and equipment

ELECTRICAL

We are pride ourselves on serving the commercial and wholesale markets with the best quality and cost-effective electrical components from the most trusted brands. Each day, our stock is being updated with the latest design and features so that our clients get what they exactly expect. Our wealth of experience in the industry has made us aware of the requirements and challenges of electrical installations and fittings.

Our Product ranges

- Junction Boxes, Termination, and fixing accessories including Ex-proof
- Electrical Cables
- Conduits and accessories
- Industrial Lightings including Ex-proof

OIL & GAS

Our Business Divisions

ENCLOSURE SOLUTIONS

HRSG ENCLOSURE

Wilorton has supplied HRSG enclosure solutions from completely covering the top to skirting the bottom of units. The modular nature of our building system reduces installation time compared to other solutions. The structural panel connections are made from the interior, keeping workers safely on the deck. Sections can also be assembled on the ground and hoisted into place, further reducing time spent in the air.

- Designed structurally to International Standards
- Custom features and configurations are factory tested before shipment
- Site visit by our engineering staff to facilitate design
- Factory representative available during onsite installation of custom projects
- Structural frame, exterior sheeting, and insulation (optional) factory assembled into panels
- Breaks down into 3' wide panels for easy assembly and access to tight spaces
- Quick assembly (four times faster than conventional steel buildings)
- Enclosures can be installed over existing equipment
- Fast delivery
- Complete crane-liftable structures including lifting lugs or hoist rings
- Lifting lug and hoist ring calculations, inspections, and proof testing available
- Easily removable roof and wall sections for equipment access
- Panelised floor systems

ENCLOSURE SOLUTIONS

Our Business Divisions

ENCLOSURE SOLUTIONS

ANALYZER SHELTERS

The analyzer shelters are designed considering ambient atmospheric, hazardous area classification, sample type, analyzer type, and client specifications. The

Critical elements of our analyzer shelters are:

- Wide range of construction materials like Stainless Steel, GRP, Galvanized Steel.
- Thermal insulation options
- HVAC Units to control and maintain the required environmental conditions.
- Safety Systems integration
- Safety Interlock Systems integrated with the client System.
- We design and manufacture analyzer shelters according to the applicable standards and project specifications.
- We use analyzers from well-known brands such as ABB, YOKOGAWA, etc.

Our Business Divisions

ENCLOSURE SOLUTIONS

MOBILE HOUSING AND MEDICAL UNITS

Wilorton is equipped to design Mobil housing enclosures using international standards. They're also highly convenient, with removable roof and wall panels that make up sizing, downsizing, or relocating easy. Most of the assembly is done before a our building ever leaves the factory. With things like doors, windows, insulation and ventilation items already installed and no need for pre-set anchors, our building products can go up fast and are usually self-installed.

- Relocatable modular panel design, buildings can be easily reconfigured or moved
- Structural frame, exterior sheeting, and insulation (optional) factory assembled into panels
- Breaks down into 3' wide panels for easy assembly and access to tight spaces
- Reusable shipping racks included with building
- Quick assembly (four times faster than conventional steel buildings)
- Enclosures can be installed over existing equipment
- No column point loads allow for a variety of temporary foundations
- Fast delivery
- Complete crane liftable structures including lifting lugs or hoist rings
- Lifting Lug and Hoist Ring calculations, inspections, and proof testing available
- Easily removable roof and wall sections for equipment access
- Temporary foundations including base channel with earth anchors
- Can be installed on existing concrete
- Re-engineering and retrofitting for change in design loads due to building relocation
- Integration of Housing, Medical equipment, and Laboratory etc

ENCLOSURE SOLUTIONS

Our Business Divisions

Automation

PROCESS AUTOMATION, SCADA SYSTEMS & PLC

We offer experienced system integration to ensure the most cost-effective, highly operational SCADA solutions.

Our Supervisory Control and Data Acquisition - SCADA systems – are widely installed in a range of industries in the field of Water Management Systems, Electric Power, Traffic Signals, Mass Transit Systems, Environmental Control Systems, and Manufacturing Systems.

With our in-plant and remote SCADA system user-friendly interface - Human Machine Interface (HMI) - monitoring multiple RTU's or PLCs, processed data are easily viewed, monitored, and controlled by an operator.

HMI's linked to a database, which can use data gathered from PLCs or RTU's to provide graphs on trends, logistic info, schematics for a specific sensor or machine, or even make troubleshooting guides accessible. All SCADA systems include an integrated HMI and PLC device making it extremely easy to run and monitor a SCADA system.

We can provide:

- Integration Services & Panel Design
- Automation panel building
- Installation Supervision & Start-up and Commissioning
- Documentation & Training
- Specifications & Software Programming

Our Business Divisions

Special Vehicles

Wilorton Special Vehicles: serves you wherever you serve

SPECIAL VEHICLES

Our special trucks are ideal for transporting materials, goods, and people in off-road conditions on arduous and rough terrain.

The special vehicles division suit any equipment: from a tipping body for transporting aggregates from quarries or mines to construction machines such as concrete mixers, concrete pumps or mixer pumps, platforms, and cranes, to unique configurations like a mobile workshop, personnel transportation, or firefighting vehicles, recovery trucks and customized solutions.

Special vehicles assemblies range from:

- Mining & Construction
- Aerial Platforms
- Liquid Transportation
- Personnel Transportation
- Special Lifting
- Heavy Haulage
- Mobile Workshops & Recovery Trucks
- Ambulances & Mobile Clinics

Our Business Divisions

MRO SPARE PARTS

The MRO parts repair management goes beyond simply replacing a broken part. When you focus on improving the reliability of every component and the machines they go into, you can capture and analyze the data to understand why that part failed and what can be done to prevent it from happening in the future.

PRECISION MACHINING

Precision machining is a process that removes excess, raw material from a workpiece, while holding close tolerance finishes, to create a finished product. Simply put, it means shaping large pieces of material into more precise parts, so that they can meet very exact specifications. This process involves cutting, milling, turning, and electrical discharge machining, and is generally performed using Computer Numerical Control (CNC) equipment.

OEM SPARE PARTS

We are dealing with more than 1000s of OEMs for spare parts inventory, and all brands are significant players of Oil and Gas industry

Our data-driven approach leads to several benefits for your plant, including:

- Decreased downtime from fewer breakdowns
- Less money tied up in spare parts inventory
- Reduced spend on MRO parts
- Extended asset life
- Enhancing maintenance efficiency

Our Maintenance, Repair, and Operating supplies (MRO) program will have a measurable impact on your MRO parts inventory management. Spare and replacement parts spending will fall, and longer component life will extend the mean time between failures. Overall equipment effectiveness will increase, freeing maintenance resources for more proactive efforts. We'll help you realize savings throughout the manufacturing process — providing end-to-end performance benefits. Contact us today to discuss how our MRO parts repair management solution can help your operations.
